Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach an apparatus and method for converting a digital input value quantized according to a first quantization coefficient and encoded over a first number of bits, into a digital output value quantized according to a second quantization coefficient and encoded over a second number of bits, the method comprising inter alia: multiplying the digital input value by a non-zero integer to generate an intermediate digital value, and fixed-point dividing said intermediate digital value to generate the digital output value; and, a variable-ratio frequency divider in a return path of a PLL, wherein the division ratio is controlled by a digital value obtained from a real value corresponding to the central frequency of a radio channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
